 Career Objective

Dedicated and disciplined engineering student with a strong analytical approach and a solid foundation in Python, SQL, and Machine Learning. I have gained hands-on exposure to **Generative AI** and **Agentic AI** ecosystems, including the design and understanding of **RAG (Retrieval-Augmented Generation)** pipelines — covering chunking strategies, vector databases, and various RAG architectures. I am familiar with **AI Agents**, **multi-agent workflows**, and automation frameworks, along with emerging protocols such as **A2A (Agent-to-Agent)** and **MCP (Model Context Protocol)**. I also possess foundational knowledge in **fine-tuning** large language models and have practical exposure to Cybersecurity fundamentals. Driven by a structured mindset and a deep interest in intelligent automation, I am committed to continuous learning and professional growth — aiming to contribute meaningfully to technology-driven environments while collaborating efficiently within teams.

 Education

Semester Wise Pointers (SGPI)				10 th %	12 th %
SEM I	6.22	SEM II	6.50	79.20%	51.83%
SEM III	7.13	SEM IV	7.13	2020	2022
SEM V	7.00	SEM VI	7.57	Harnai Vidyalaya , Goregaon Mumbai.	Thakur Collage of Sci. & Com. Kandivali Mumbai.
SEM VII	8.05	SEM VIII			

Engineering

Bachelor of Engineering (B.E) – Data Science Engineering Saraswati College of Engineering, Mumbai University
Kharghar, Navi Mumbai

Internship Experience

AI Developer Intern (Offline) *Self-Directed / Practical Training | Duration: [3 month]*

- Built and deployed end-to-end **RAG (Retrieval-Augmented Generation)** pipelines, including chunking strategies, vector database integration, and retrieval optimization.
- Developed and experimented with **AI Agents** and **multi-agent workflows** using real-world use cases.
- Hands-on experience with **MCP (Model Context Protocol)** and **A2A (Agent-to-Agent)** protocols for agent communication and orchestration.
- Designed and implemented **workflow automations** using **n8n** and **Zapier**, integrating AI tools into practical pipelines.
- Continuously explored and tracked the **evolution of AI technologies**, including Generative AI, Agentic AI, and LLM advancements.
- Applied learning through project-based development, strengthening problem-solving and independent research skills.

Business Analyst & Team Leader *Uptoskills | Duration: 3 Months*

- Guided a small team during research and reporting tasks.
- Learned how to interpret data, identify patterns, and assist in basic dashboard creation.
- Gained exposure to teamwork, communication, and time management in a real-world setting.

Cybersecurity Trainee *DSCI Advanced Cyber Skill Centre Bootcamp | 40 Hours*

- Completed intensive hands-on cybersecurity training organized by Employment Express, DSCI.
- Successfully cleared the **Capture The Flag (CTF)** exam and earned certification.
- Learned advanced security concepts, threat analysis, and real-world cyber practices.
- Gained strong motivation and confidence to explore cybersecurity as a technical domain.

Certifications

Generative AI Mastermind – Outskill Deloitte Data Analytics Job Simulation

DSCI – Advanced Cyber Skill Centre Bootcamp (40 hours) + CTF Clearance

AI & Machine Learning

- Generative AI, Agentic AI, and Large Language Model (LLM) concepts
- RAG (Retrieval-Augmented Generation) — chunking strategies, RAG types & architectures
- AI Agents & Multi-Agent Systems (A2A Protocol, MCP — Model Context Protocol)
- Vector Databases (concept & integration)
- Exposure to various AI tools and platforms

Programming & Data

- Python (foundational to intermediate)
- SQL — data querying and interpretation
- Data handling, pattern recognition, and basic report creation
- Basic Machine Learning concepts and workflows

Automation & Workflow Tools

- n8n — workflow automation and AI pipeline integration
- Zapier — task automation and tool connectivity
- Workflow design and multi-step automation logic

Cybersecurity

- Cybersecurity fundamentals and threat analysis
- Capture The Flag (CTF) — certified
- DSCI Advanced Cyber Skill Centre trained

Soft Skills

- Communication & Presentation
- Leadership & Team Coordination
- Adaptability & Continuous Learning
- Analytical Thinking & Problem Solving

Projects

1) NLP-Enabled E-Blogging Platform

A beginner-level blogging platform integrating basic NLP features (under development).

- Objective: To help users write blogs and experiment with features like summarization and translation.
- Key Concepts: Basic blog creation, UI design, and simple integration of NLP libraries.
- Tech Stack: Python (Flask), HTML/CSS, NLTK (planned)
- Status: UI design in progress, NLP modules to be integrated.

2) Project Title: ADHD Risk Screening using draw and pattern

- Analyzed user-drawn inputs to detect behavioral traits using OpenCV.
- Designed a draw-based ADHD screening tool using pattern recognition.
- Enhanced ADHD risk prediction with AI and ML-powered visual analysis.

3) Forensic sketch generation and recognition

- Developed an AI – based forensic sketch generation system using python, flask and deep learning.
- Implemented multilingual text and voice input support for accurate suspect description processing.
- Integrated facial recognition and similarity matching to identify suspects from image database.
- designed sketch editing, dashboard managements and automated investigation workflow features.

Strengths

- Willingness to Learn & Improve
- Team Collaboration & Leadership
- Curiosity for Data & Technology
